Experience:

Keep America At Work

Aug 2007 – present

Researched the following government data to demonstrate that it is necessary for us to hire Americans in America if we believe in the belief that all men are created equal, regardless of their circumstances of birth, and documented the results of that research at Keep America At Work.

- Office of Foreign Labor Certification statistics and annual reports
- Department of Homeland Security statistics and annual reports
- Occupational Employment Statistics
- Employment, Hours, and Earnings (CES)
- Labor Force Statistics (CPS)
- Veteran Statistics (CPS)
- Native Born and Foreign Born Statistics (CPS)

H-1B Hunting Licenses

Jan 2016 – Present

Developed databases to showcase how foreign born non-immigrant guest workers were being hired instead of American citizens. Developed the theory that companies in a premeditated manner are deciding which American citizen to layoff before they pay for the hunting license (LCA Application) and if they win the lottery to do so and compared this to a moose hunting license in Maine. Developed the Wall of Shame to document using youtube, google news, google maps, SQL Server, ASP.net, HTML, CSS and Javascript

Dynamic Interface Systems Corporation

Feb 2016 – Aug 2016

- Tasked with migrating a VB6 program to C#
- Developed technology to show owner how C# can easily be used to create tables in Access or SQL Server

- Tasked with developing .NETdll's that can be used within VB6 and found out that while it was fairly straight forward in VB.net, it was not possible using C#.

The Chief Information Group, Inc.

May 2010 – Aug 2010

- Hired by the Chief Information Group to work on the NAVMISSA project for the U.S. Navy
- Upon arriving I found that the Navy had inherited the project and they were not familiar with the system so I reverse engineered it so that we could see what it did and develop a plan to move forward.
- System was developed using SharePoint, SQL Server and ASP.net
- Data files were placed in a network folder each day that were used to prepare fitness reports for sailors and our job was to process those files in a timely manner

Objectwin Technology, Inc.

Aug 2009 – Oct 2009

- Hired by Objectwin Technology to work at the Office of the Attorney General in Texas.
- Tasked with a "Software Assessment" to determine how to best replace the existing system
- Met with all business process leaders to determine what they liked and disliked about the current case management system and documented same.
- Developed a plan of attack to replace the existing system using COTS software.
- Project was cancelled for economic reasons

Signature Solutions

Jan 2008 – May 2008

- Hired by Signature Solutions to work on the World Savings to Wachovia Merger.
- My duties were to document the operation of the software for the department that handled appraisals using a custom Lotus Notes solution.
- Worked with representatives of other departments to develop a companywide reporting solution system.
- After Wells Fargo bought out Wachovia, I was tasked for working with the various department to develop documentation for the "Touch Points" between the various systems so that they could decide the best way to replace the system.

Hitachi Consulting

Sep 2005 – Nov 2005

- I was hired to go into a company as a Foxpro developer with the collateral duty of learning everything the existing developer did in case he decided to jump ship after the merger.
- Should he “jump ship”, I was to take over his duties

Eurosoft

May 2005 – Aug 2005

- I was hired to support and enhance an existing foxpro based web solution that was used to maintain data for a medical system

American Reliable Insurance

Oct 2004 – May 2005

- Hired to support an existing Foxpro DOS system that was the primary system used to process all insurance documents.
- Working with the .NET team, I developed an interface that they could use to “poll” the data so that neither system was dependent on the other system.
- Facilitated nationwide weekly support meetings
- Worked with helpdesk to resolve complex citrix terminal server printing and other problems.
- Using existing error logs, I developed a system that would allow us to focus on reducing system errors.

Alliance Gaming

Dec 1999 – Feb 2003

- Responsible for the support and enhancement of all software utilized for manufacturing slot machines and other equipment.
- Worked closely with the Chief Operations Officer to fix business and system problems.
- Worked with all business stakeholders to document their processes so that we could better meet their needs by redesigning the existing software
- Met with C level executives to develop a phased implementation plan that would give us an escape from the PLM implementation should the vendor not meet the requirements that were agreed on.
