## Keep America At Work

Founded in August 2007 by THE DISPLACED AMERICAN Volume 00118 August 2023

Nothing makes me madder than hearing these folks on TV saying Americans don't want to work. And when we attempt to communicate with them that we do want to work, we never get a response.

Several years ago I sent 25 emails per day to a list of $H-1 B$ Employer email addresses over a period of many months until I had sent it to 57\% of all email addresses, and this list had every employer in it, large and small, and I never received one single response.

This is the email I sent:
I develop database systems.
No job is too big or too small.
To see what data we have on your company, you can enter your company name in the Employer Name and / or Secondary Employer on this page.

## https://guestworkervisas.com/CurrentData.php

For those wanting to expand their business, you might be interested in our contact list of 71,086 unique company contacts.

This list was compiled from all H-1B applications for 2021 and can be found on our store.
We also have a list of 34,198 unique immigration attorney contacts available.
Simiar products are available on the open market for much more, but these are $\mathrm{H}-1 \mathrm{~B}$ specific which is why I believe they may be useful to your business.

Respectfully,
Virgil Bierschwale

## GuestWorkerVisas.com

Not one single response, so $I^{\prime} m$ in the process of creating a new email list of 63,609 distinct email addresses. I will change the email content and track the results for any of you journalists writing about what is happening.

As you may have noticed yesterday, the Computer and Mathematical occupation group receives the largest amount of non-immigrant guest worker applications, primarily because it pays some of the best wages available in America.

So tell me, how many jobs do you think we create in the computer and mathematical occupation per year?

I ask this question because our citizens are bombarded to go to school and get a good education so you can get a great paying job in software as our employers can't find enough software engineers.

If you go to the Bureau of Labor Statistics website for the Occupational Employment and Wage Statistics, you will find that they update this data in May of every year.

You can click here to go to that website if you want to run the numbers yourself.

These numbers are for the 15-0000 Computer and Mathematical occupation only.

|  |  |  |  | Jobs Gained |  | Rows |  |  |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |

| 2016 | $4,165,140$ | 2015 | $4,005,250$ | 159,890 | 7 |  |  |  |
| 2015 | $4,005,250$ | 2014 | $3,834,180$ | 171,070 | 8 |  |  |  |
| 2014 | $3,834,180$ | 2013 | $3,696,180$ | 138,000 | 9 |  |  |  |
| 2013 | $3,696,180$ | 2012 | $3,578,220$ | 117,960 | 10 |  |  |  |
| 2012 | $3,578,220$ | 2011 | $3,406,720$ | 171,500 | 11 |  |  |  |
| 2011 | $3,406,720$ | 2010 | $3,283,950$ | 122,770 | 12 |  |  |  |
|  |  |  |  |  |  |  |  |  |
|  |  |  |  | $1,719,960$ | Total Jobs Gained |  |  |  |
|  |  |  |  |  | 12 | rows |  |  |
|  |  |  |  |  | 143,330 | Jobs Gained Per year |  |  |
|  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |

I want you to think about this.
We create an average of 143,330 Computer and Mathematical Jobs per year.
Yet using our governments Office of Foreign Labor Certification, you will see that had 602,206 non-immigrant guest worker applications for FY 2022.

This is for one year only, and if you study this data enough, you realize that about $70 \%$ of those applications are for the Computer and Mathematical jobs.

So tell me, if we create 143,330 jobs per year and we have about 420,000 applications per year, do you think it will be hard for you, the American citizen to find work when they go to the head of the line?
